Greetings to the American Farmers and Gardeners for 1954

Dear Customers and Friends:

Shumway's first Seed Catalog, published in 1870, was a 16-page book—size 6 x 9, total edition, 4,000 copies. Today this beautiful Catalog has 92 pages—size 10 x 13½—many items featured in natural colors—Garden, Flower and Field Seeds, Bulbs, Roses, Gardenias, Carnations, Small Fruits, House Plants, Hardy Shrubs, Perennial Plants, Hardy Lilies, Glads, Evergreens; in fact "Everything for the Garden." Edition a million copies. We refer you to Page 2 for our Complete Index.

As we go to press with this, our 84th annual Catalog, we find the world in a period of readjustment following the second great World War. There is still a great deal of unrest. As relief from the strain and sadness of war, many people have turned to gardening, which is encouraging as it points the way to a better and happier form of life.

Plant A Garden

A modest Garden will afford you fresh Vegetables and Fruit all summer long with sufficient quantity to can and store for winter consumption. This is one very definite way to reduce your living expenses, and at the same time enjoy the world's Finest Fruits and Vegetables fresh from your own Garden.

May we suggest that you and your good wife and family carefully look through the Catalog at your earliest convenience; one writing on the order sheet enclosed the things you need; the other member of your family checking the items in the Catalog so you will have a copy of your order to check against your list when shipment is received. If you should find a shortage or mistake in any of your purchases, feel free to write us promptly.

We are all indeed grateful to Almighty God for his many blessings during those trying years referred to above, and likewise appreciative to you for your valued patronage of many years' standing.

If you should receive more than one copy of our catalog, would you please give one to a friend interested in gardening. Thank you.

Yours most sincerely,

R. H. Shumway

It forms a rather loose head made up of flower buds. The plants branch freely and each branch terminates in a head or bud cluster. The center heads are cut first and as the side shoots develop they are cut with about 6 inches of stem and bunched for market. Frequently 5 and 6 cuttings are made from one plant. Large heads of bright green, tender sprouts, which are cooked like Spinach or Brussels Sprouts and have a most delectable flavor, even milder and more palatable than that of Cauliflower. Sow the seed in May and harvest in August. I have a very remarkable strain of this vegetable which has become a great favorite. Pkt., 25 cts.; ½ oz., 50 cts.; oz., 85 cts.; ¼ lb., \$1.75; ½ lb., \$2.75; lb., \$5.00, postpaid.

Witloof or French Endive. This splendid vegetable gives every gardener a chance to grow his own winter salad, since the roots can easily be forced in the cellar during the winter. To grow the roots, sow the seed in the open not later than June 1 and lift them in the fall. For forcing, dig them and pack closely together in boxes and cover with 6 in. of sand, light earth, peat moss or sawdust. When the sprouts break through the surface, they are ready for the table. Pkt., 15 cts.; oz., 60 cts.; ¼ lb., \$2.00, postpaid.

Fordhook Bush Lima

221 Fordhook Bush Lima. The most popular of all bush lima beans. A dwarf form of the "Potato Lima" and a universal favorite wherever Bush Lima Beans are grown. It is gaining in popularity every year because its dwarf growth and its great productiveness make it ideally suited to the small home garden as well as to the large acreage of the market gardener. Its strong erect growth keeps the pods off the ground so that they are not injured by wind or rain, thus avoiding rust and rot. The pods, which are produced in clusters, contain 4 or 5 large, fat beans of the finest quality, packed so closely together that they are very easily shelled. The beans are always tender, juicy, and sweet, and may be used green or dried. Either way they are rich and buttery, having the real lima bean flavor. Medium early. Ready for table use in 75 days. Pkt., 15 cts.; $\frac{1}{2}$ lb., 45 cts.; lb., 80 cts.; 2 lbs., \$1.50; 5 lbs., \$3.25, postpaid. An excellent freezing variety.

225 Early Giant Bush Lima—A Good Freezer

The largest podded bush lima bean. A true bush type growing $1\frac{1}{2}$ ft. in height, very rugged and upright in growth. It is as easily grown as snap beans and will bear from July until taken by frost. A fine yielder of pods 5 to 6 inches long, containing beans as large as the largest pole lima variety. It is a tender, rich and buttery-flavored variety, the thick pods holding the flavor well. Those who enjoy lima beans should not fail to grow this variety. Pkt., 15 cts.; $\frac{1}{2}$ lb., 45 cts.; lb., 80 cts.; 2 lbs., \$1.50; 5 lbs., \$3.25, postpaid.

Fresh Lima Beans are Delicious

Plant Some This Year

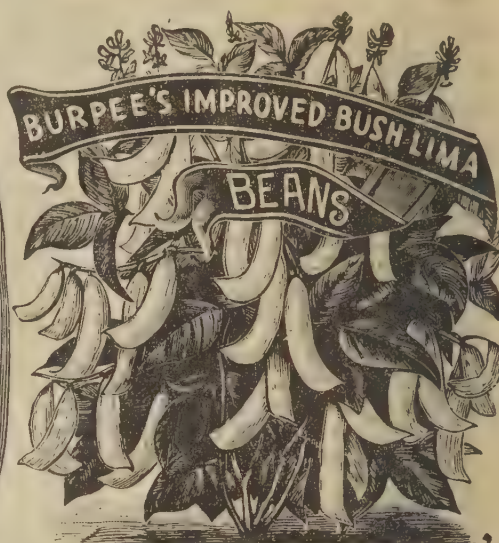

Limas are tender and should not be planted until all danger of frost is passed. On Dwarf varieties make rows 2 to 3 feet apart, and plant Beans on edge with eye down every 6 to 8 inches. Cultivate well, but only when plants are dry and only up until they blossom.

Exceptionally productive all through the season, bearing in large clusters, the light green pods containing 3 to 5 beans of rich, buttery flavor. Where the market gardener prefers the pole variety of limas, this is superior to the others as it takes to the poles more readily than any other sort. This is also a remarkable variety for the home garden where one has limited space. Pkt., 15 cts.; $\frac{1}{2}$ lb., 45 cts.; lb., 80 cts.; 2 lbs., \$1.50; 5 lbs., \$3.25, postpaid.

222 Burpee's Improved Bush Lima. The earliest large podded bush lima bean. Enormous yielder, 3 to 5 large fat beans in each pod. The pods are 5 to 6 inches long. The vines are heavier, and the beans are larger and thicker than the original Burpee's than the other. The plants are strong and vigorous, producing quantities of handsome pods grown in clusters and well filled with beans of luscious flavor. Ready in 65 days. NOTE

TESTIMONIAL
August 18th

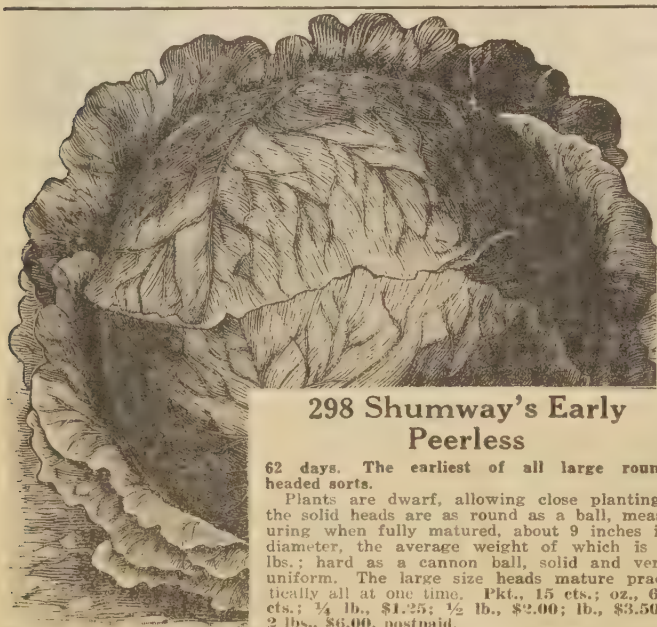

Dear Mr. Shumway:

This past week I contributed 13 Bu. of my choicest heads of Cabbage for the annual sauerkraut supper sponsored by the Fishers' Association of our church this fall. Many of the heads weighed over 15 pounds. I have provided the vegetables for the table at our summer camp for boys for the past 3 years. I am well pleased with the quality and service I have received from your company.

Merle D. Shultz,

319 Extra Early Snowball (Superior Quality)

319 Extra Early Snowball. Ready for market in 50 days from transplanting. The standard early type, very sure heading and good quality. The plants are dwarf, and the leaves cluster closely, protecting the heads and permitting thick planting. The heads mature early and are good-sized (7 to 8 inches in diameter), round, deep, firm, snow-white, and of fine texture. Extremely well adapted to greenhouse forcing, but also as a late planter. Keeps well for shipping. Pkt., 30 cts.; ¼ oz., 90 cts.; ½ oz., \$1.65; oz., \$2.75; ¼ lb., \$8.00; ½ lb., \$14.00; lb., \$26.00, postpaid.

Dry Weather or Danish Giant 322 Dry Weather or Danish Giant. Midseason or dry weather variety. This foremost cauliflower originated in Denmark and is truly most outstanding since it will produce attractive, remarkably large heads during dry seasons when all other varieties of cauliflower will be a complete failure. It is a quality cauliflower in all respects. The closely formed pure white curd is attractive and very tender. Though it grows well in dry seasons, moist or wet seasons do not in any way harm it. It is an excellent home garden and market variety which will please you. Ready for market in 60 days. Pkt., 25 cts.; ¼ oz., 85 cts.; ½ oz., \$1.50; oz., \$2.50; ¼ lb., \$7.00; ½ lb., \$13.00; lb., \$21.00, postpaid.

320 Super Snowball

320 Super Snowball. This wonderful strain of Cauliflower is the particular variety that the market gardeners have wanted for some time. Its extreme earliness, about 7 days earlier than Early Snowball, and uniformity of heading will excel the others for early marketing. Before the foliage is full grown and the heads have begun to appear the inside leaves begin to curl and twist forming a protection. The outside foliage is strong and vigorous. This strain heads up evenly throughout the field, which no other Cauliflower is known to do. The heads are decidedly larger, deeper and more solid than the other varieties. Pkt., 35 cts.; ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.00; ¼ lb., \$9.00; ½ lb., \$16.00; lb., \$30.00, postpaid.

423 Garlic Bulbs Easy to Grow

Plant these to store for winter use. A bulbous root of the onion type, for flavoring soups, stews, etc., and can be used without planting also. The bulbs or sets are composed of several parts, which should be divided and planted in rows 1 foot apart, 4 inches apart in

the rows and one inch deep. When the tops turn yellow take up and dry in the shade. ½ lb., 55 cts.; lb., 90 cts.; 2 lbs., \$1.60; 5 lbs., \$3.50, postpaid.

Tall Golden Self Blanching

329 Celery, Superior Golden Self Blanching Tall. The best tall growing variety in our trials. The distinctive feature of this wonderful variety is that it is literally self blanching. It is a favorite with both market gardeners and the home planters. The plants grow 20 to 22 in. tall. They are remarkably solid and ready for the table in about 110 days. Though it is essentially an early variety it will store quite well until about Christmas or New Year's Day. The foliage of the growing plants is a greenish yellow, but when blanched it is an appealing waxy yellow color. The thick solid stalks blanch to a beautiful golden yellow. They are extremely solid, free from strings, and have a remarkably rich nutty flavor. Pkt., 20 cts.; oz., 90 cts.; ¼ lb., \$2.50; ½ lb., \$4.50; lb., \$8.50, postpaid.

CELERY—1 ounce of seed will produce 4,000 plants Shumway's Superior Varieties for Home or Market

327 Giant Pascal

327 Known as Winter King. 135 days. Considered by many the standard winter celery. Plants are large, upright and very heavy. Stalks are tall and thick, solid, stringless, and of a rich, nutty flavor; broad, distinctly ribbed, tender, crisp, and very tasty. After blanching they are an attractive light yellow. Inasmuch as the stalks are green, soil should be used for blanching. If properly stored, it will keep in perfect condition throughout the winter months. Whether grown for home or market use, Giant Pascal has always given entire satisfaction. Pkt., 20 cts.; oz., 90 cts.; ¼ lb., \$2.50; ½ lb., \$4.50; lb., \$8.50, postpaid.

328 White Plume

328 Pure white—delicious flavor—crisp and succulent. This magnificent celery is improving from year to year under high culture and careful selection. It is a truly beautiful type. The entire plant blanches perfectly white. This makes the White Plume celery one of the most showy ornaments that can be put upon the Thanksgiving or Christmas dinner table. As to succulence, crispness and quality, White Plume is all that can be desired. Fit to eat in 110 days. Very valuable for early fall and winter use. Pkt., 15 cts.; oz., 60 cts.; ¼ lb., \$2.00; ½ lb., \$3.85; lb., \$7.50, postpaid.

351 Improved Golden Bantam

Extra Select Pure Bred Seed

Very popular early Sweet Corn. The standard of the yellow varieties. The ears are very uniform, 6 to 7 inches long with 8 rows. The kernels are broad and evenly set, rich golden yellow in color, tender, sweet and palatable. Somewhat dwarf in habit, the plants measure only about 4½ to 5 feet in height, usually yield two ears to the stalk. A sure cropper, very productive and equally valuable for home or market garden. Ready for use in 75 days. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

359 Howling Mob

Ready for table in 85 days. The finest early midseason Sweet Corn ever introduced. It is vigorous and productive, with ears 7 to 9 in. long, closely set with 12 or 14 rows of beautiful pearly white grains. The kernels are arranged neatly in straight rows which give them a particularly attractive appearance and make it easy to eat from the cob. The kernels are deep and contain a large quantity of delicious sweet pulp beneath the thin tender skin. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

358

Shumway's Extra Early Market Gardeners

An outstanding, luscious, early strain of sweet corn. An exceptional variety for market gardeners as the name implies. The kernels are silvery-white and extremely sweet. It remains in table quality for a considerable period, which makes it particularly profitable. In this variety I consider we have one of the best varieties of sweet corn offered. Ready for table in 65 days. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

363 Early Evergreen

A selected strain of Stowell's Evergreen bred for earliness. It will produce edible ears a week to ten days earlier than the Stowell's Evergreen. For this reason it is a valuable market sort providing a succession to the second early types. In other respects its qualities are practically identical with Stowell's; ears 7½ inches long; 12 to 14 rows; deep white luscious kernels, remaining in table condition a long time. Ready for table in 80 to 85 days. A favorite in northern, cooler localities. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

370 New Golden Gem

An entirely new variety developed by the North Dakota Experiment Station and the earliest yellow sweet corn on the market, producing ears in 67 days. The ear is about the same size as Sunshine, but has only 8 to 10 rows. Quality, tenderness and sweet flavor are unsurpassed. The plant is exceedingly short, but vigorous and productive and certain to be a great favorite. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

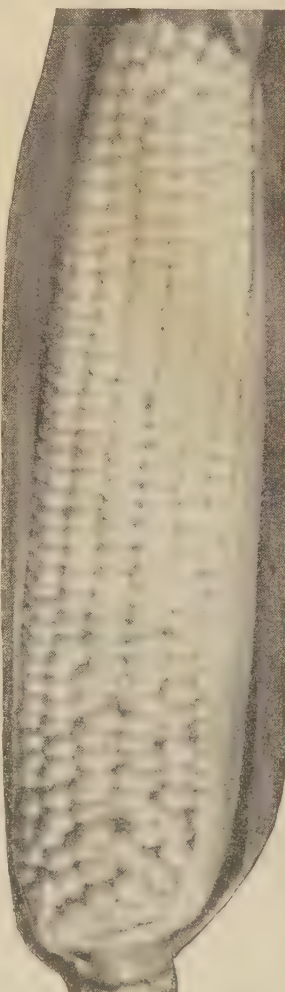

367 Early Golden Market

• One of the later introductions in early Sweet Corn maturing marketable crop in 70 days from time of planting. Ears 8 inches long, 10 to 12 rowed, fine grained, delicious flavor, stalks 4½ feet high. I consider this the leader by far of all early yellow varieties of Sweet Corn. A sure money maker for market gardeners where a matter of 5 to 10 days in marketing a crop makes a tremendous difference in the value per dozen or 100 ears. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

353 Whipple's Early Yellow

A new medium early yellow variety valuable for its large ears and excellent quality. The ears are 8 to 10 inches long and have 14 to 16 rows of deep kernels, very tender and sweet. Ready for table in 70 days. A fine type for either the home or market garden. A good yielder. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

369 Whipple's Early White

A grand early white corn. The ears have 16-20 rows of deep rather narrow kernels and are of very fine quality. The ears are 8-9 inches long, and large around. They look like well bred Evergreen yet they mature two to three weeks earlier. Market gardeners find that the size, high yield (there are often two good ears on a stalk) and earliness make this a very profitable kind to grow for markets where a white corn is wanted. Ready for use in 80 days. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

350 Golden Sunshine

Ready in 68 days. A quite new, remarkably fine, extra early variety originated through selective breeding by Professor A. F. Yeager of the North Dakota Experiment Station. It is earlier than Golden Bantam and stays in table quality for a greater length of time. The ear is about one inch longer and has 10 to 12 rows instead of 8. The kernels are sweeter, more tender and a lighter yellow in color. The plant is taller and more vigorous. Because of its earlier maturity, longer season and superior quality, it brings better prices than the Bantam and is displacing the latter in many markets. Pkt., 17 cts.; ½ lb., 40 cts.; lb., 70 cts.; 2 lbs., \$1.30; 5 lbs., \$2.75, postpaid.

405-A and C

A New Outstanding 63-Day White Spine Shipping Type

9 to 10 inches long. This relatively new market and home garden variety has been planted in a more limited way because of the scarcity of seed, production of which cannot keep up with the increasing demand. It is a vigorous grower, disease-resistant, and makes an abundance of very deep green, slender cukes of even diameter. A real money maker. Pkt., 15 cts.; oz., 45 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; 1 lb., \$3.00; 2 lbs., \$5.50, postpaid.

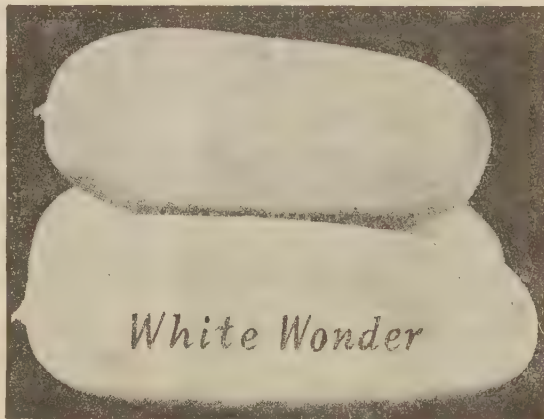

392 Everbearing Shumway Special Strain

52 days. The Name Tells the True Story. An ideal type for early small pickles that is becoming more popular every year. Pkt., 15 cts.; oz., 45 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; 1 lb., \$3.00; 2 lbs., \$5.50, postpaid.

394 We Supply this Annually to many of the largest Pickle Manufacturers in America. 58 days. A valuable and reliable small early pickling variety. Fruits are uniform in size and shape, 7 inches by 2½ when full-grown, tapering only slightly toward the end. Good color, black-spined. Vines bear continuously if fruits are picked; very productive. Pkt., 15 cts.; oz., 45 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; 1 lb., \$3.00; 2 lbs., \$5.50, postpaid.

White Wonder

399 Excellent as a Slicer or for Pickles. 58 days. A unique variety producing fruits that are pure white in color from the time they begin to form until they are fully mature. The skin is smooth and very thin. The fruits grow to a good size, about 8 by 2½ inches; round-ended. Flesh is solid and crisp and of good flavor; very nice for slicing and for salads. A fine exhibition type. Heavy yielder. Pkt., 20 cts.; oz., 50 cts.; ¼ lb., \$1.25; ½ lb., \$2.00; 1 lb., \$3.50; 2 lbs., \$5.95, postpaid.

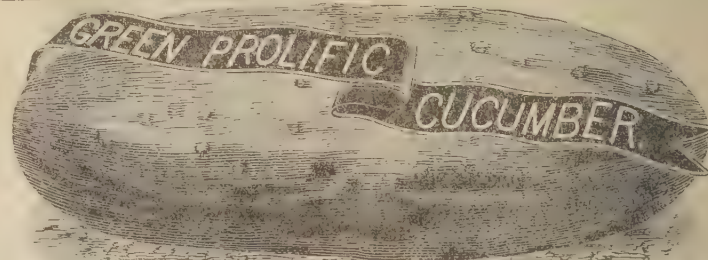

403 Early Fortune

65 days. An outstanding early type for long distance shipping. It is much grown in the South for early shipment to northern cities, and has recently become a very popular variety with the northern market gardeners. It has a fine dark green color and remains in table condition longer than any other white-spined variety. The flesh is white, solid, and crisp, with an unusually small seed cavity. A very productive yielder. Pkt., 12 cts.; oz., 35 cts.; ¼ lb., 85 cts.; ½ lb., \$1.35; 1 lb., \$2.25; 2 lbs., \$4.25, postpaid.

DAVIS PERFECT

398—65 days. Enormous Yielder either in Greenhouse or Outdoor Plantings. A favorite white-spined variety, 10 to 12 inches long, about 2 inches thick, tapering slightly to each end. The color, a glossy dark green, is held for a considerable time after picking. The flesh is firm, translucent and delicious. The seed cavity is small and the fruits are tender and juicy. The plants are prolific, vigorous and blight-resistant. A fine slicing type, also valuable for shipping. Wonderful yielder. Pkt., 12 cts.; oz., 35 cts.; ¼ lb., 85 cts.; ½ lb., \$1.35; 1 lb., \$2.25; 2 lbs., \$4.25, postpaid.

395—55 days. "Sometimes known as Boston Pickling." Of good quality and fit for slicing, but because of its small size, 5 by 2½ inches, it is more popular for pickling. It produces early and yields a large and continuous crop if vines are kept plucked. The fruits are bright green, smooth, uniform and square-ended. Excellent for early pickles. Pkt., 12 cts.; oz., 35 cts.; ¼ lb., 85 cts.; ½ lb., \$1.35; 1 lb., \$2.25; 2 lbs., \$4.25, postpaid.

391 Longfellow "The Largest of All and One of the Best"

72 days. Unquestionably the finest of the large white-spined varieties. It is long, 12 to 15 inches, slender and round-ended. The fruit, dotted with white spines, is a uniform dark green. Because of its length and weight it takes the form of the soil beneath; so to secure perfectly straight specimens it is necessary to smooth out the ground under the growing fruit. The flesh is firm and of good quality with few seeds; excellent for slicing. This variety is equally suitable for greenhouse forcing or field culture. Early tomato blossoms often fail to set fruit and drop off the plants, especially when nights are cold and days are short and cloudy. Spraying the blossoms with No-Seed Hormone BLOSSOM-SET makes them set fruit; keeps them on the plants.

That means you'll get first tomatoes weeks earlier... tomatoes that otherwise would not have developed at all. These tomatoes are more uniformly shaped, bigger, meatier, and have better color and more delicious flavor. Many are seedless.

Use it also on CUCUMBERS, EGGPLANTS, PEPPERS, SQUASH. Makes them produce more and better.

798 BUCKBEE'S NEW TOMATO
ABRAHAM LINCOLN

World Beating TOMATO

This famous Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son, Abraham Lincoln. This giant Tomato was first introduced by H. W. Buckbee in 1923 and is the largest Tomato we have ever grown. We have had as many as 9 Tomatoes in a single cluster with a total weight of 7 pounds; the average weight however is about a pound, but customers have reported producing single fruits weighing nearly 3 pounds. Color, beautiful dark red fruits, extra heavy, large, sweet, solid and meaty, with very few seeds, and for so large a Tomato it is remarkably smooth and free from cracks and seams.

The
Giant
of
All

Tomatoes

Abraham Lincoln Tomato, while unusually large, ripens all the way through the fruit, making it an ideal variety for Catsup, Chilli Sauce, Tomato Juice, and slicing. It is a very shy seeder; therefore the flesh is firm and meaty.

The plant is a sturdy, healthy grower with distinctive bronzy green foliage; it ripens the first fruit immediately following the ones of the first sort, and continues bearing from that time until the plant is killed by frost. This variety was originated on H. W. Buckbee's Seed Farm in Rockford, Illinois, and in the recent purchase of the "Buckbee" business we secured the original stock seed, and offer same to you of our own production, at the following special prices: Catalog No. 798—Pkt., 30 cts.; 4 pkts., \$1.00; ¼ oz., \$1.50; ½ oz., \$2.50; oz., \$4.00, postpaid.

Mrs. H. R. Cusil, Henderson, Ky.—Your Abraham Lincoln Tomatoes are superfine. Had clusters of 6 to 10 fruits that averaged over 1¼ lb. each.

Geo. Lintz, Alton, Ill.—I raised 5 Abraham Lincoln Tomatoes in one cluster that weighed 11½ lbs. Every one was as smooth as an apple.

Shumway's Superior Lawn Grass Seed for Homes and Golf Courses

5 lbs. used for 1000 sq. ft. or 50 x 20 ft.

1605 Shumway's Forest City Shady Place Lawn Seed

Getting an attractive lawn under trees or in between apartment buildings has been a problem with many home owners but this Forest City Shady Place Mixture will solve your difficulty. It is a combination of fine, dwarf growing, evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour," and if the drainage is defective it is apt to be covered with moss and coarse Grasses. In such cases an application of slaked lime, at the rate of one hundred pounds to each thousand square feet, or two tons to the acre, is an excellent corrective and sweetener, but the moss should be first raked off. Sow seed at the rate of 1 lb. for 200 sq. ft., 5 lbs. for 1,000 sq. ft. Postpaid, 1 lb., \$1.45; 2½ lbs., \$3.50; 5 lbs., \$6.75; 10 lbs., \$13.00. Not Prepaid, 25 lbs., \$30.00; 50 lbs., \$56.50; 100 lbs., \$110.00.

1601 Shumway's Rockford Park Refined Lawn Seed Mixture

This is by far the best mixture of grasses for a fine textured lawn. It is made up of the choicest and hardiest varieties that will winter well and thrive under varying climatic conditions. It has been re-cleaned, compounded and blended as perfectly as modern machinery can do it. All of our grasses are analyzed by the seed laboratories and the degree of purity shows the elimination of practically all chaff and foreign seeds.

If we could compound a better lawn mixture we would do so, but through tests we failed to find its superior. Postpaid, 1 lb., \$1.45; 2½ lbs., \$3.50; 5 lbs., \$6.75; 10 lbs., \$13.00. Not Prepaid, 25 lbs., \$30.00; 50 lbs., \$56.50; 100 lbs., \$110.00.

All Our Lawn Seed is Treated with "Arasan S. F.X.," giving 40% or more Increase in Stand.

1603 Shumway's Rolling Green Mixture

A compounded mixture of quick growing grasses and White Clover that will make a quick show of green over the lawn. This mixture, however, is not one that will give the very fine texture of Shumway's Refined, but it will make a very creditable lawn and stand heavy usage when established. Postpaid, 1 lb., \$1.15; 2½ lbs., \$2.75; 5 lbs., \$5.25; 10 lbs., \$10.00. Not Prepaid, 25 lbs., \$23.00; 50 lbs., \$45.50; 100 lbs., \$90.00.

Almost all of these varieties will come up again as fast as they are eaten down and will furnish 4 to 5 times as much forage as can be obtained from any clover-grass mixture. This mixture will prove a most profitable investment for every farmer. It is usually sown about corn planting time, but can also be sown as a catch crop any time during the season until August. Sow 50 lbs. per acre. Postpaid, 1 lb., 60 cts.; 2½ lbs., \$1.35; 5 lbs., \$2.25. Not Prepaid, 10 lbs., \$2.50; 25 lbs., \$5.75; 50 lbs., \$10.50; 100 lbs., \$20.00.

1525 Bromus Inermis—Brome Grass

It is a long lived hardy northern grass that withstands drought better than other grasses. It makes good hay of about the same quality as Timothy, but it is much more valuable for pasture either alone or with Alfalfa.

Alfalfa and Brome Grass. Recent tests at Michigan State College have shown that a mixture of Brome Grass and Alfalfa makes ideal summer pasture during the mid-summer season when it is needed the most. On light sandy soil in northern Michigan this mixture produced over a ton of hay per acre from the first cutting and good pasture for the balance of the season.

For this purpose 10 lbs. of Alfalfa and 5 lbs. of Brome grass seed are sown per acre either in the spring or in August. When sown alone, Brome grass is seeded at the rate of 20 lbs. per acre. It may be seeded with Oats, Barley or Wheat. The mixture of Alfalfa and Brome Grass gives best results when a good top growth is permitted before pasturing. Cattle will eat the Brome Grass in preference to the Alfalfa, giving the latter a chance to become well established.

Postpaid, ½ lb., 45 cts.; 1 lb., 75 cts.; 2½ lbs., \$1.75; 5 lbs., \$3.25. Not Prepaid, 10 lbs., \$2.65; 25 lbs., \$6.25; 50 lbs., \$12.00; 100 lbs., \$23.00.

1551 Clover White Dutch For Lawns and Pastures

The famous pasture clover. Also used in lawns. Low growing, drought resistant and very nutritious. Adds greatly to pasture value. The seed is very small. 3 to 4 pounds sows an acre. One seeding lasts many years. May be sown in early spring on old pastures or with new seedings. In mixtures sow 1 to 2 lbs. per acre. Since it requires so little seed per acre the cost of using it is small. Use More White Dutch Clover. Postpaid, ¼ lb., 45 cts.; ½ lb., 80 cts.; 1 lb., \$1.50; 2½ lbs., \$3.60; 5 lbs., \$7.00. Not Prepaid, 10 lbs., \$11.00; 25 lbs., \$25.00; 50 lbs., \$48.00; 100 lbs., \$95.00.

1597 Astoria or Colonial Bent Grass

Special mixture of domestic Bent Grasses. Your lawn, seeded with this mixture and properly cared for will be as beautiful as a putting green. For lawns it is better to use the seed than the Stolons, because the lawn will not grow so rapidly and the home owner can keep up with the mowing. Seed at the rate of 3 to 4 lbs. per 1,000 square feet. Postpaid, ½ lb., \$1.00; 1 lb., \$1.75; 2½ lbs., \$4.00; 5 lbs., \$7.50. Not Prepaid, 10 lbs., \$11.00; 25 lbs., \$25.00; 50 lbs., \$48.00; 100 lbs., \$95.00.

1615 Timothy (45 lbs. Bu.)

Purity 99½%, Germination 90%

Sow in Spring or Fall 12 lbs. per acre. As a crop to cut for hay, Timothy is probably surpassed by no other grass now cultivated. It is usually sown with other grasses about one-half to one-third of the above amount. Timothy Seed is one of my specialties. Postpaid, 1 lb., 65 cts.; 2½ lbs., \$1.50; 5 lbs., \$2.50. Not prepaid, ¼ bu., \$2.60; ½ bu., \$5.00; 1 bu., \$9.75; 2 bu. and over @ \$9.65 per bu.

1618 Timothy and Alsike Mixture (45 lbs. Bu.)

Mixture Contains 20% Alsike; 80% Timothy

The Greatest of All Pasture and Hay Crops

By far the best and cheapest seeding. On low-bottom, moist soils where other grasses fail, this will give perfect satisfaction, and on upland it's amazing what wonderful crops you can raise.

By experimenting it was found that Alsike and Timothy made a combination that was excellent and ahead of anything yet discovered for hay and pasture. They blossom and the seed ripens together and are suited to the same soils. On low, moist lands, where other grasses would fail, they do especially well. They do well on any land where common grasses and clover grow.

One great advantage that is realized by a mixture of these grasses is the fact that they are both perennials and make a better combination than most any other two. When you once get them established they stay right with you until you wish to break up the sod. They do not winter kill. Sow 10 to 12 lbs. per acre. Postpaid, ¼ lb., 45 cts.; 1 lb., 75 cts.; 2½ lbs., \$1.75; 5 lbs., \$3.25. Not Prepaid, ¼ bu., \$2.95; ½ bu., \$5.65; 1 bu., \$11.00; 2 bu. and over @ \$10.95 per bu.

1585 Alta Fescue

An improved strain of tall fescue which was developed at the Oregon Agriculture Experiment Station. Produces high yields of palatable forage over a long growing season. For pasture sow 15 pounds per acre with other legumes such as Ladino Clover. Grows well on wet soil even when poorly drained, but also will endure drought. Because of its extensive root system it has the ability to prevent soil erosion in waterways and to form a dense turf on banks. It stands up under traffic and though coarse is excellent for athletic fields, airports, playgrounds and lawns where there is heavy traffic. Postpaid, ¼ lb., 45 cts.; 1 lb., 75 cts.; 2½ lbs., \$1.75; 5 lbs., \$3.25. Not Prepaid, 10 lbs., \$2.65; 25 lbs., \$6.25; 50 lbs., \$12.00; 100 lbs., \$23.00.

Here is an excellent grade of Alfalfa Seed at a Low Price suitable for sowing across the nation in latitude south of Springfield, Illinois.

We were fortunate in getting a limited supply of this seed that we can offer for prompt order at prices far below Kansas and other Alfalfa Seed produced farther north. We recommend this for the localities mentioned, but for sowing in the north, we again recommend Kansas Seed, which is recognized as one of the hardest types. Postpaid, 1/2 lb., 50 cts.; 1 lb., 85 cts.; 2 1/2 lbs., \$2.00; 5 lbs., \$3.75. Not Prepaid, 1/4 bu., \$5.15; 1/2 bu., \$10.00; bu., \$19.50; 2 bu. and over @ \$19.40 per bu.

1531 Alsike, or Swedish Clover "Excel Brand" (60 lbs. Bu.)

Sow in spring. 8 lbs. per acre

Alsike seems to be especially adapted for the Northern States; it is a perennial clover and lives longer than Medium Red; it is also more hardy; in fact, it is the hardest of all clovers; it does not heave out of the ground in Winter and the severest cold does not injure it and it resists the extremes of drought and wet. It is the only clover that will thrive on moist soil, but it will also grow fairly well in stiff clays. It is mostly grown in bottom lands and quite often mixed with Timothy; these varieties seem to be well adapted for this soil and ripen at the same time. Postpaid, 1/2 lb., 50 cts.; 1 lb., 85 cts.; 2 1/2 lbs., \$2.00; 5 lbs., \$3.75. Not Prepaid, 1/4 bu., \$4.45; 1/2 bu., \$8.75; bu., \$17.00; 2 bu. and over @ \$16.90 per bu.

Every farmer ought to sow at least one acre for his hogs. Postpaid, 1/2 lb., 50 cts.; 1 lb., 80 cts.; 2 1/2 lbs., \$1.85; 5 lbs., \$3.50. Not Prepaid, 1/4 bu., \$3.90; 1/2 bu., \$7.65; bu., \$14.95; 2 bu. and over @ \$14.85 per bu.

2 Great Perennial Legume Crops!

1566 Ladino Clover

Ladino Clover is a perennial form of Giant White Dutch Clover which spreads by surface runners that root at the joints. The main branch of the runners lie flat on the ground, but the leafy stalks which produce the foliage grow from 15 to 24 inches tall and the leaves resemble in size and shape those of Red Clover. Excellent for pastures, and should not be sown alone except for seed purposes. Excellent for lowlands that are not wet, and for pasture recommend a mixture of 2 lbs. of Ladino, 3 lbs. Medium Red Clover and 8 lbs. of Brome Grass. On upland 1 lb. of Ladino Clover mixed with 8 lbs. of Alfalfa, 3 lbs. Red Clover and 8 lbs. Brome Grass will give you a wonderful pasture that will last about 4 or 5 years. Postpaid, 1/2 lb., 65 cts.; 1 lb., \$1.15; 2 1/2 lbs., \$2.75; 5 lbs., \$5.25. Not Prepaid, 10 lbs., \$8.25; 25 lbs., \$19.50; 50 lbs., \$38.00; 100 lbs., \$75.00.

1567 Broadleaf Birdsfoot Trefoil

A long life, deep rooted legume that will grow on poor or rich soil and will stand a moderate amount of alkali. Provides the finest feed when most other pasture grasses and clovers are dormant. Plants grow stems 12 to 30 inches long. Has a deep tap root with many branches. Crop resembles fine stemmed Alfalfa, and is high in mineral and protein content. Sow 5 lbs. per acre alone. However, we recommend sowing 2 lbs. in mixtures of other grasses such as Timothy, Blue Grass, Orchard Grass, or Brome Grass. Shallow sowing, 1/4 to 1/2 inch no deeper, in well prepared seed bed is essential. Postpaid, 1/2 lb., 60 cts.; 1 lb., \$1.05; 2 1/2 lbs., \$2.40; 5 lbs., \$4.50. Not Prepaid, 10 lbs., \$6.00; 25 lbs., \$14.00; 50 lbs., \$27.75; 100 lbs., \$55.00.

In habit of growth and maturing same as Tall Common. It is a biennial, just like the Common, but it does not grow quite as tall. However, it produces a high quality hay and lots of it. It is a wonderful soil builder, and in addition it is better for pasture than the Common as it stays green longer. Postpaid, 1 lb., 60 cts.; 2 1/2 lbs., \$1.35; 5 lbs., \$2.40. Not Prepaid, 1/4 bu., \$2.75; 1/2 bu., \$5.35; bu., \$10.25; 2 bu. and over @ \$10.15 per bu.

Postpaid, 1/2 lb., 55 cts.; 1 lb., 95 cts.; 2 1/2 lbs., \$2.15; 5 lbs., \$4.15. Not Prepaid, 1/4 bu., \$6.45; 1/2 bu., \$12.75; 1 bu., \$25.00; 2 bu. and over @ \$24.90 per bu.

1539 Mammoth Red or Sapling "Excel Brand" (60 lbs. Bu.)

Domestic Grown Seed. Sow 12 lbs. per acre

Is quite distinct from the Medium Red Clover, being larger, or coarser and more robust growth, and two to three weeks later. On rich, loamy soils it attains an immense growth, yielding much more bulk than medium clover, but makes only one crop, and pasture after that. Largely used to restore fertility to worn-out soil. Postpaid, 1/2 lb., 55 cts.; 1 lb., 95 cts.; 2 1/2 lbs., \$2.15; 5 lbs., \$4.15. Not Prepaid, 1/4 bu., \$6.45; 1/2 bu., \$12.75; 1 bu., \$25.00; 2 bu. and over @ \$24.90 per bu.

1535 Lespedeza-Korean—Annual (Broadcast 15 lbs. to the acre)

Hulled Scarified Seed FREE from Dodder—(60 lbs. Bu.)

The abundant growth and deep penetrating roots covered with nodules make it an outstanding grazing and soil building legume. The strong root growth penetrates about 8 inches deep, making it highly drought resistant, and capable of thriving on poor, wornout soils. In feeding value it is about equal to alfalfa; has no woody stem; holds its leaves well and produces a full crop the first season. A harrowing before sowing is the only preparation necessary. Postpaid, 1 lb., 85 cts.; 2 1/2 lbs., \$2.00; 5 lbs., \$3.75. Not Prepaid, 1/4 bu., \$5.15; 1/2 bu., \$10.00; bu., \$19.50; 2 bu. and over @ \$19.40 per bu.

1537 Lespedeza-Sericea—Perennial (60 lbs. Bu.)

Hulled Scarified Seed FREE from Dodder—(60 lbs. Bu.)

It grows on poor, acid or sour land as well as rich land. It is a great drought resister with an enormous root system. It enriches the soil and gives at least 3 cuttings a season with as high as 3 tons per acre at one cutting. Stock relish the hay and it may be closely grazed.

Sow rather shallow in the spring or fall in well prepared, warm soil 4 lbs. per acre in drills or 12 lbs. per acre broadcast. Postpaid, 1 lb., 95 cts.; 2 1/2 lbs., \$2.15; 5 lbs., \$4.15. Not Prepaid, 1/4 bu., \$5.85; 1/2 bu., \$11.45; bu., \$22.50; 2 bu. and over @ \$22.40 per bu.

1593 Canada Field Peas (60 lbs. Bu.)

There just isn't anything that equals a mixture of Canadian Field Peas and Oats seeded in the early spring at the rate of one bushel of each per acre as a hay crop. This combination hay makes an average yield of 2-18/100 tons of excellent feed per acre. Almost equal pound for pound with Clover hay. Relished by all classes of stock. Canadian Field Peas are very hardy; therefore may be seeded just as soon as it is safe to sow Oats. Postpaid, 1 lb., 55 cts.; 2 1/2 lbs., \$1.25; 5 lbs., \$2.00. Not Prepaid, 1/4 bu., \$1.95; 1/2 bu., \$3.70; bu., \$6.95; 2 bu. and over @ \$6.85 per bu.

When danger of frost is over sow broadcast 1 Bu. per acre or 45 lbs., in drills 36 inches apart. Cowpeas produce one of the largest and the most nutritious forage crops grown. When turned under, they furnish nitrogen and generally enhance the fertility of the soil. They make a fine feed for work and beef-stock and for dairy herds. Postpaid, 1 lb., 55 cts.; 2 1/2 lbs., \$1.25; 5 lbs., \$2.00. Not Prepaid, 1/4 bu., \$2.35; 1/2 bu., \$4.45; bu., \$8.50; 2 bu. and over @ \$8.40 per bu.

1599 Reed Canary Grass

Excellent for Pasture and grazing—makes 2 cuttings a season—yielding 5 to 7 tons per acre. A very valuable new perennial hay and pasture crop especially desirable for low, marshy land. Nothing like it has been thus far produced as it puts land that is just a dead waste into production of valuable forage.

CULTURE. Sow in early spring, alone or with grain, 4 to 6 pounds of seed per acre broadcast, or 2 to 3 pounds with drill. Late summer and late fall seeding are also recommended. Postpaid, 1/2 lb., 55 cts.; 1 lb., 95 cts.; 2 1/2 lbs., \$2.15; 5 lbs., \$4.15. Not Prepaid, 10 lbs., \$4.30; 25 lbs., \$10.25; 50 lbs., \$19.50; 100 lbs., \$38.00.

Shumway's Big Yielding Hybrid and Open Pollinated Seed Corn—Well Graded—High Germination—Sold on Your Approval

1577

Shumway's Goliath Silo or Ensilage Seed Corn

The World's Greatest Yields—Many Report 50 to 75 Tons Per Acre.

For many years I have worked on this World's Famous Ensilage Corn, Selecting and Reselecting Pure Bred Seed and today I feel safe in saying it leads all others in growth of fodder-producing stalks 18 to 22 feet high. The leaves are broad and long, they start forming at the lower end of the stalk and continue to the very top. It has a strong root system thereby not affected by wind or drought. I produce this seed South of the Ohio River and do not recommend it to ripen as far North as Rockford. It is solely a silo filler and one acre will produce more tons of feed than 5 acres of ordinary corn.

Postpaid, lb., 55 cts.; 2½ lbs., \$1.25; 5 lbs., \$2.00. Not Prepaid, ¼ bu., \$1.75; ½ bu., \$3.20; bu., \$6.00; 2 bu. and over @ \$5.90 per bu.

1556 Funk's G-114—Hybrid Yellow

(Tops the List for North Central Corn Belt)

Some people call it "intestinal fortitude." Others call it simply "guts." Anyway, in G-114, it's the ability to stand up against the beating that the North Central Corn Belt often hands out in weather and in insect attacks. Against cold spring dampness. . . . Against scorching summer drought.

Against blasting wind. . . . Against corn borers and other insect enemies, G-114 comes through. Even when harvest is long delayed, G-114 stands, firmly erect. In Iowa 4-year tests, its percentage of lodging was lowest (2.9%) of any strain entered. And it yields with the best. G-114 foliage stays green after the ear starts to mature, making the extra starch necessary to finish both a heavy ear and a strong stalk. Postpaid,

lb., 60 cts.; 2½ lbs., \$1.35; 5 lbs., \$2.50. Not Prepaid, ¼ bu., \$3.00; ½ bu., \$5.90; bu., \$11.40.

Postpaid, lb., 55 cts.; 2½ lbs., \$1.25; 5 lbs., \$2.00. Not Prepaid, ¼ bu., \$1.75; ½ bu., \$3.20; bu., \$6.00; 2 bu. and over @ \$5.90 per bu.

The average height is 7½ feet, while the ears are set about 3 feet from the ground. Postpaid, lb., 55 cts.; 2½ lbs., \$1.25; 5 lbs., \$2.00. It may be sown on newly broken ground in the spring and as late as July. Leaves the ground in excellent condition for the following crop. Plant 30 pounds to the acre. Postpaid, lb., 55 cts.; 2½ lbs., \$1.25; 5 lbs., \$2.00. Not Prepaid, ¼ bu., \$2.15; ½ bu., \$3.95; bu., \$7.50; 2 bu. and over @ \$7.40 per bu.

1627 Billion Dollar Grass (35 lbs. Bu.)

All things considered, we call this the most valuable thing in our whole list of forage plants. We recommend it for the following reasons: First, it makes more hay than German Millet or any other. Second, although it grows so large, sometimes seven or eight feet high, the hay is of the most excellent quality, superior to corn fodder. Third, it is adapted to all sections and a great success wherever tried. It does well on low ground. Fourth, two crops a season may be cut from it, or, if left to ripen, it will yield almost as many bushels of seed per acre as oats. Plant 20 to 25 pounds per acre. Postpaid, lb., 55 cts.; 2½ lbs., \$1.25; 5 lbs., \$2.00. Not Prepaid, ¼ bu., \$1.25; ½ bu., \$2.35; bu., \$4.25; 2 bu. and over @ \$4.15 per bu.

This tree is tapped in the spring and produces the Maple syrup and sugar of the trade. They may be tapped for Maple Sugar and syrup after they get to be about 8 or 10 inches in diameter and tapping the trees does absolutely no injury or harm to them. Maple sugar and syrup is in great demand and we have yet to see the person who has made it, but what could easily sell their total product.

The Fall color of the Maple is one of its outstanding attributes. The color is gorgeous and lasting, being by far the most colorful of any of the deciduous trees.

N-2825 New Thornless Youngberry

Different from any berry grown. Cross between Loganberry and Dewberry. Vines are thrifty growers, very productive and immune from disease. The rich wine-colored 1½x1¼ inch fruit which ripen earlier than Dewberries are delicious fresh or canned. The wine-colored juice is ideal for fruit cocktail. Flavor is pleasant, sweet with the tartness of the Blackberry. Culture same as Dewberries. 5 for \$1.60; 10 for \$2.75; 25 for \$5.25; 50 for \$9.45; 100 for \$16.75, prepaid.

N-2829 Senator Dunlap

The Old Reliable Thrives Everywhere

It has made more crates and more dollars for berry grow-
ers than any other one variety. Requires very little attention.
It's the toughest variety known. Plants are healthy, fast
growers, and make plants freely. Should be set in rows 24 in.
by 36 in. apart in rows. Berries very dark red. Wonderful
canning berry; great for preserves. Senator Dunlap is some-
times sold under the name of Dr. Burrill. We can see no
difference between these two varieties, except the cost of the
plants. 25 Plants, \$1.40; 50 for \$2.50; 100 for \$3.95; 250 for
\$8.50; 500 for \$13.50; 1000 for \$22.00; 2000 and over @ \$20.00

N-2833 FAIRFAX—Largest and Sweetest

Extra Early. Experienced Strawberry growers who have tested Fairfax
have placed it at the very top of the list for quality. It is extra early, having
the same bearing season as Premier, but is a much heavier bearer. The early
blooms do not show serious frost damage, and the fruiting season extends
over a long period. Holds up well as a market variety and stands long-distance
shipping. 25 Plants, \$1.40; 50 for \$2.50; 100 for \$3.95; 250 for \$8.50;
